Bank of Africa – NIDA Integration.

About the App.

The App files can be found in the path: C:\NIDA\ on 10.124.73.125 and can be accessed at <http://10.124.73.125:3000> .

The app is served using PM2 process manager.

As the app has frontend and backend services you will need two processes.

- `index`: backend
- `static-page-server-3000`: frontend

At any time, you can run command `pm2 monit` or `pm2 list` to see the processes.

For more details about the processes run `pm2 show 0` or `pm2 show 1`.

How it works

The app is very simple to use.

- Login with Windows credentials
- You'll be redirected to the page where you can enter the NID number to see results from NIDA

Possible issues

The following issues will be alerted in the app itself

- API Down/Unavailable: this depends on the availability of the API Server. If the issue takes long, please contact BNR/NIDA for further support.
- User can't log into the app while both Username and Password are correct. You will have to first check if the backend process is running. If it is running, check if the Exchange server is up.
